TABLE I: Demonstration of simple table syntax.

Right	Left	Center	Default
12	12	12	12
123	123	123	123
1	1	1	1

Abstract—**Abstract goes here. You can write it on multiple lines, and it can contain equations like $a = b$.**

I. INTRODUCTION

We are in section I.

Here is a reference [1]. So far so good.

Some equation is presented in (1) below:

$$x = 1 + 2 \tag{1}$$

A nice image is in Fig. 1.

We can also have a nice looking table, Table I. Just keep it small, you may get problems if it is larger than one page.
